COMMENTS

What did you like best about the program?

- hands on to explore, Linda's open teaching style, handouts, room set up

- basic overview
- very knowledgeable presenter
- coverage of total census site
- this was great! I learned a lot about AFF2 and the census. excellent presenter
- the new AFF takes some getting used to; it was great to get a formal demo of it
- interesting statistical tool
- catering! parking free!
- opportunity for an overview of site and data sets
- great overview
- breadth of coverage
- the hands on working with the American Fact Finder was very useful, especially since it was not intuitive
- learning about access to info about writing grants, etc.; as an at risk teacher, this would be beneficial to me
- it was good to actually be able to do the exercises on the laptops as she was teaching
- nice overview of census info; helpful thanks!
- how knowledgeable the presenter was – and also how approachable; this is a huge topic, but opened lots of prospects for further research; excellent workshop
- use of technology

Least?

- the last 20 minutes would have been more effective in a powerpoint – I wanted to follow on my computer but of course it moved too quickly
- not enough time
- too much info!!!
- barely enough time
- may be an extra 15 minutes – our break was too long
- moved too quickly
- would have liked more hands on but I realize we would have needed another hour or two
- so much to cover, would have liked to have learned more about demographics for businesses
- too much info; search examples were less relevant to me. I was hoping for something more practical to help me as a librarian to help the public
- went too fast
- room was a bit cold
- very fast

Other comments you want to share with the presenter(s) or CE Committee?

- well done and needed
- great snacks! thanks! also a very nice space
- room seemed chilly
- great choice for program
- snacks were decent but both that I had had hair in each (cake with white frosting, blueberry scones)

Topic suggestions for future workshops.

- customer service
- customer service
- more tech tools or research tools topics

COMMENTS

What did you like best about the program?

- presenter was friendly and expert and responsive

- overview of navigation features; changes from old version
- helped break the ice for a scary sounding topic
- very good overview of information available
- lots of practical information and examples
- range of coverage; hands-on exercises
- hands on activities were good for increasing understanding
- hands outs and hands on
- brief overview of a lot of different topics and offering more help individually if needed
- covering the high points of the census information

Least?

- I think I needed a more basic primer or intro to census data as a whole
- lots to cover
- lack of time to cover more searches
- network connectivity made it hard to follow along with activities
- so much
- hard to keep up and/or understand searches

Other comments you want to share with the presenter(s) or CE Committee?

- thanks! very useful!
- thanks
- make tables/maps easier to cite

Topic suggestions for future workshops.
